

# HEALTH AND SAFETY POLICY

THE BASIC GUIDELINES OF OUR HEALTH AND SAFETY POLICY ARE:

ensure safe and healthy working conditions to prevent work-related injuries and damage to health,

constantly strive to eliminate hazards and reduce health and safety risks,

meet legal and other mandatory requirements,

prevent incompetent people from gaining access to work positions,

prevent emergencies and situations, including fires,

give equal weight to safety as well as business (economic) aspects in the planning of production facilities, technological processes and the choice of equipment, while taking their entire life cycle into account,

consult and cooperate with workers and/or their trustees in dealing with occupational health and safety issues,

encourage employees to participate in various recreational activities and to take care of their own health,

inform employees and other stakeholders about the achievements and the situation in the field of health and safety at work,

continuously improve occupational health and safety systems.
