

# ENERGY POLICY

## THE FUNDAMENTAL PRINCIPLES OF OUR ENERGY POLICY ARE:

We recognize and comply with legal requirements and the requirements of other interested parties that are binding for us.

We ensure the availability of information and necessary resources to achieve energy goals.

We continuously educate and train ourselves for responsible energy management.

Continuous improvement of energy management.

We encourage suppliers of products and services to use the best energy management technologies and/or establish an energy management system.

We purchase energy-efficient products and machines.

We prioritize renewable energy sources and alternative sources.

We give priority to the development of technologies that improve energy efficiency.
